

Junior Business Solution Analyst (Contract)

Founded in 2015 to address the unmet financing needs of SMEs, **Validus is today the largest online lending marketplace in Singapore** with a growing presence in Indonesia, Vietnam and Thailand.

An award-winning Fintech, Validus uses data analytics and AI to provide growth financing to SMEs via funds from HNWIs and institutional investors. Backed by global VCs, our mission is to drive financial inclusion for SMEs through technology, data and industry collaboration.

As with the SMEs we serve, we may be small but together we are a mighty force! Our success is dependent on what each of us does, how we do it, and our belief that we can always do better. We're building a strong team of passionate, capable individuals who are committed to making Validus the best online lending marketplace in the region.

We are looking for an enthusiastic, detail-oriented professional to join our Group Technology team in our Singapore office. The ideal candidate will have critical-thinking and problem-solving abilities, and a passion to drive large-scale digital projects to implementation with accuracy and efficiency. As a member of the Group Technology team of the Company, they would also be expected to provide business solutions and support to markets outside Singapore, for our offices in Indonesia and Vietnam. This is a 6 month contract and will be subject to conversion to permanent employee depending on performance.

Job Responsibilities:

- Interact with business users/Product Owner and understand business processes and requirements
- Perform requirements analysis and solution design on product backlog items
- Collaborate closely with developers as part of an agile development team
- Perform functional testing and coordinate acceptance tests with users
- Be the bridge between the Business and Technology team during solution and all phases of Agile delivery.

Skills & Attributes for success:

- Plan and conduct training to users as part of project delivery
- Provide solutions and options on issues encountered by end users
- Strong interpersonal skills required to liaise with other subject matter experts to problem solving issues or generating ideas

Job Requirements:

- Degree in Computer Science, Engineering, Information Systems or related disciplines
- Strong analytical, problem solving skills and attention to detail
- Strong written and verbal communication with emphasis on technical writing skills
- Basic knowledge of UX/UI design concepts
- Keen appreciation of how technology will be able to enhance the finance sector
- Knowledge of test automation will be an advantage
